

Legal Promotional Gaming

KIOSK SOLUTION

LEGAL

To promote the sale of internet services and products, we have created a revolutionary promotional entertainment system with over 100 different games that enable players to multiply or lose their credits.

The promotional games are not considered gambling as they don't allow any monetary (cash) winnings and have the sole objective to encourage the sale of the present e-commerce products within the same site. Credits accumulated during promotional games only allow to purchase e-commerce products and aren't convertible into monetary values (cash), as stipulated by paragraph 16 of the European directive preamble about electronic commerce.

All promotional games are fully legal games recognized throughout the EUROPEAN Community. They have been approved by all the European member countries and follow the Directive on e-commerce:

Directive 2000/31/EC (32000L0031) of the European Parliament and of the Council of 8 June 2000 on certain legal aspects of information society services, in particular electronic commerce, in the Internal Market (Directive on electronic commerce) and fully comply with point 16 of the directive.

[16] The exclusion of gambling activities from the scope of application of this Directive covers only games of chance, lotteries and betting transactions, which involve wagering a stake with monetary value; this does not cover promotional competitions or games where the purpose is to encourage the sale of goods or services and where payments, if they arise, serve only to acquire the promoted goods or services.

The installation of the terminals (iVT) do not require any authorization as the internet terminals are not considered devices devoted to gambling.

The iVTs may be used for free web surfing or for "closed circuit surfing" avoiding access to other web sites and communication with other people and e-commerce platforms.

Next Generation Design

DESIGNED TO ENTERTAIN

State of the Art System & Support

MANAGE & MARKET

Success in this business is about more than just games. Our platform includes the Central Gaming System (CGS), which provides every staff member with the exact functionality they need to do their jobs easily and successfully, making sure that the revenue stream continues uninterrupted.

THE HIGHLIGHTS OF THE CGS

Complete real-time overview of the entire operation, providing levels of detail all the way down to each machine on the network, with an intuitive and user-friendly access interface

- A web-based client for immediate business access from anywhere, anytime
- Comprehensive real-time reporting on each & every aspect of the operation
- Fully component- and permission-based system to secure your operation
- Extensive onsite monitoring capabilities (monetary procedures, real-time alerts, individual terminal activity and more)
- Easy automatic content updates

PROFESSIONAL SERVICES

Interactive's professional services offer operators a powerful, stable and secure operation for their platform, which enables the operators to focus on their core business. It is the most cost efficient and flexible way to operate your promotions and increase your sales.

Multi Channel Solution

COMBINE FOR BIGGER SUCCESS

Our Terminal System is a true client-server solution suited for operators with great demands regarding security, flexibility and an unlimited, unsurpassed content (over 100 games already available).

We believe that future customers will demand real multi-channel multiplayer gaming possibilities and this is exactly what we are providing them with.

Our Multi Channel Solution is designed to satisfy customer needs at anytime, anywhere and forever: at home, land based casinos, gaming venues or at your local Bar and Restaurant.
